PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with hands-on experience in building, optimizing, and deploying full-stack web applications. Proficient in React.js, Node.js, Express.js, and MongoDB with a strong understanding of REST API design, secure JWT authentication, and state management. Adept at solving real-world engineering challenges and contributing effectively to product-driven development teams.

TECHNICAL SKILLS

Programming: JavaScript (ES6+), Python

Frontend: HTML5, CSS3, Tailwind CSS, React.js, Redux

Backend: Node.js, Express.js, REST APIs, JWT, Middleware

Databases: MongoDB, Mongoose

Tools & Deployment: Git, GitHub, Postman, Netlify, Vercel, Render

EDUCATION

Bachelor of Computer Applications (BCA)

Makhanlal Chaturvedi National University – CGPA: 8.1/10

2022 – 2025

Bhopal, MP

EXPERIENCE

Web Developer

Freelance / Self-Employed

May 2026 – Present

Remote

- Developed **Gautatva**, a responsive service-based web platform utilizing React.js and Tailwind CSS for client-facing interfaces.
- Integrated interactive service catalogs, intuitive navigation, and optimized state handling to streamline user engagement.

Unified Mentor

Frontend Development Intern

Jan 2025 – Mar 2025

Remote

- Maintained reusable React.js component libraries, reducing redundant code by 30% and improving UI rendering speed.
- Collaborated with a 4-member team to integrate RESTful APIs, enhancing overall platform stability and performance by 35%.

KEY PROJECTS

KnowaLearning – Full-Stack LMS Platform

[GitHub](#)

[Live Demo](#)

- Engineered a full-stack Learning Management System supporting dual roles (student & instructor) with secure JWT-based authentication.
- Built an instructor dashboard for tracking course purchases, revenue analytics, and student enrollment metrics in real time.
- Integrated Razorpay payment gateway and designed responsive UI in React.js with Node.js/Express.js backend and MongoDB.
- **Stack:** React.js, Node.js, Express.js, MongoDB, JWT, Razorpay, Tailwind CSS, Render/Vercel

StayBnB – Full-Stack Property Rental Platform

[GitHub](#)

[Live Demo](#)

- Developed an Airbnb-style rental platform with full authentication flow (register, login, session management) using JWT.
- Implemented "List Your Home" feature allowing property owners to post listings with images, pricing, and location details.
- Designed and documented RESTful APIs for CRUD operations on listings and bookings with MongoDB as the primary database.
- **Stack:** React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Clouinary

Vision Assistant – AI-Powered Conversational Agent

[GitHub](#)

[Live Demo](#)

- Built a full-stack AI chat platform integrating Groq API (LLaMA model) for real-time, low-latency conversational responses.
- Added Web Speech API (Speech Synthesis) for voice-output interactions, enhancing accessibility and user engagement.
- Deployed frontend on Vercel and backend on Render with CI/CD-aligned workflows; protected routes via JWT middleware.
- **Stack:** React.js, Node.js, Express.js, MongoDB, Groq API, Tailwind CSS, Render, Vercel

CERTIFICATIONS

• **JobReady AI-Powered Full-Stack Cohort** – Sheryians Coding School

2024–25

• **Full-Stack Web Development Roadmap** – OneRoadMap

2024

KEY ACHIEVEMENTS

- Built and deployed **6+ full-stack MERN applications** with live production hosting on Render and Vercel.
- Improved application performance by up to **35%** through code splitting, lazy loading, and API optimization.
- Maintained **25+ GitHub repositories** with structured branching, clean commits, and version control practices.
